Yankun *Wang*

San Francisco Bay Area, CA | (734) 548-7871 | yankunux@gmail.com | https://yankun.design

Product designer who makes complex, *invisible* systems easy to handle, from research to high-fidelity prototypes in code. Six years on B2B consoles, most recently Webex Control Hub, where IT admins set up devices, apps, and AI.

EXPERIENCE

Product Designer | Jul 2024 – Present

Cisco Webex | Milpitas, CA

- Own end-to-end design for the Control Hub AI Assistant, growing monthly adoption from 3% to 18%.
- Designed Smart Search for enterprise admins, cutting search dead ends by 86%.
- Designed a no-code, canvas-based workflow builder for Control Hub admin automation, extending Webex Flow Designer.
- Defined and prototyped agentic AI patterns for running workflows from the AI Assistant: editable plans, human approval, and audit trails.
- Designed Webex developer experience: Control Hub settings for apps, agentic apps, MCP, and integrations.
- Defined the UX for Control Hub Workspace MCP for external AI clients.
- Moved the team from static mockups to live React prototypes on the product codebase.

UX Designer | Jul 2020 – Jul 2024

SAP Fieldglass | Palo Alto, CA

- Led design of the modular homepage and built its widget system, plus worker dashboard and profile patterns that surface pending tasks, spend signals, key dates, and role-specific actions; adopted by 1,000+ enterprise customers.
- Designed AI-assisted hiring and procurement concepts, including resume-ranking visualizations and generated procurement descriptions, to reduce manual decision prep in complex hiring workflows.

UX Design Intern | May 2019 – Dec 2019

University of Michigan – Center for Academic Innovation | Ann Arbor, MI

- Designed educational web apps and helped build the team's first design system.

INDEPENDENT PROJECTS

Ebb | Jul 2026

iOS app, live on the App Store | yankun.design/works/ebb

- A three-breath pause before TikTok or Instagram opens, designed and built in SwiftUI in two weeks.

ZAO | Sep 2026 – Present

Agent-friendly design system, in progress | zaoui.dev

- A React design system that gives AI coding agents fewer choices and clearer rules.

EDUCATION

University of Michigan – Ann Arbor

Master of Science, Human-Computer Interaction | 2020

Bachelor of Science, Architecture | 2018

SKILLS

Design: Interaction design, Prototyping, Design systems, Agentic AI UX, User research, Accessibility

Build: Figma, React, TypeScript, Tailwind CSS, SwiftUI, Claude, Codex, Cursor
