Portfolio: https://yankun.design/

Product designer for enterprise AI who carries design from research into working code. Six years making dense B2B admin workflows readable, actionable, and trustworthy, most recently the AI Assistant in Webex Control Hub.

EXPERIENCE

Product Designer
Cisco Webex
Milpitas, CA | Jul 2024 – Present

- Own end-to-end interaction design for the Control Hub AI Assistant, evolving it from a help bot into contextual assistance across search, reports, dashboards, and device workflows; grew monthly adoption from 3% to 18%.
- Designed Smart Search for enterprise admins from query-log analysis, LLM retrieval and ranking behavior, and user feedback, cutting search dead ends by 86%.
- Defined the interaction patterns for agentic AI in Control Hub: editable plans, human approval moments, visible execution, and audit trails for admin-controlled actions.
- Built the team's AI-native design workflow: a prototyping playground on the product codebase, reusable AI skills, and Write Like Webex, a Figma plugin for UI copy. Moved the team from static mockups to live React prototypes.

UX Designer
SAP Fieldglass
Palo Alto, CA | Jul 2020 – Jul 2024

- Led design of modular homepage, worker dashboard, and worker profile patterns that surface pending tasks, spend signals, key dates, and role-specific actions; framework adopted by 1,000+ enterprise customers.
- Designed AI-assisted hiring and procurement concepts, including resume-ranking visualizations and generated procurement descriptions, to reduce manual decision prep in complex hiring workflows.

UX Design Intern
University of Michigan – Center for Academic Innovation
Ann Arbor, MI | May 2019 – Dec 2019

- Designed educational web apps and helped build the team's first design system.

INDEPENDENT PROJECTS

Ebb | iOS app, live on the App Store
Jul 2026 | yankun.design/works/ebb

- A three-breath pause before TikTok or Instagram opens, designed and built in SwiftUI in two weeks.

ZAO | Agent-friendly design system, in progress
Sep 2026 – Present | zaoui.dev

- A React design system that gives AI coding agents fewer choices and clearer rules.

EDUCATION

University of Michigan – Ann Arbor
Master of Science, Human-Computer Interaction | 2020
Bachelor of Science, Architecture | 2018

SKILLS

Design: Interaction design · Prototyping · Design systems · Agentic AI UX · User research · Accessibility

Build: Figma · React · TypeScript · Tailwind CSS · SwiftUI · Claude · Codex · Cursor
